

BITSNAP®

BITSNAP, which opens automatically at a gentle touch of the button, impresses by its comfortable, user-friendly handling. The fanned out, semicircular arrangement allows the easy taking of each single bit.

Moreover, the high quality bits and universal holder with keyless chuck in the closed box are very visible, but protected from falling out.

We only use special high quality glass fibre reinforced plastic for the production of the BITSNAP.

- With a gentle touch of the button, the box opens automatically in your hand.
- An open construction allows the light slide and taking of the high quality universal holder with keyless chuck.

- The fan shape design enables the easy removal of each single bit.
- In the closed position the bitholder is protected from dropping out.
