MAXXPRO[®] stainless

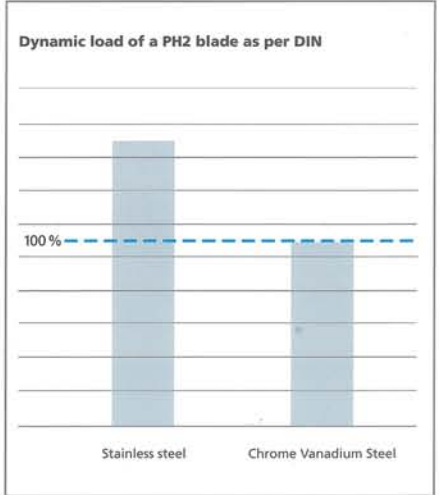

Today, many high-quality products are made of stainless steel because of its durability and appearance. Products made of stainless steel require the use of stainless steel fasteners. It is very important to use a stainless steel screwdriver when working with stainless steel screws, otherwise extraneous rust, pitting or corrosion can be caused.

WITTE Werkzeuge **MAXXPRO Stainless** screwdriver blades are "Ice-Hardened" for excellent durability in heavy duty industrial use. Stainless Steel meets Stainless Steel.

Problem: Extraneous rust. When tightening stainless steel screws with ordinary screwdrivers, abrasion can be a result, which leads to corrosion in the screw. Extraneous rust can be caused.

Solution: Using a **MAXXPRO Stainless** screwdriver from WITTE Werkzeuge eliminates the potential for any extraneous rust and damage.
